DETAILED ACTION

A request for withdrawal of Office Action dated 05/18/2004 and Applicants' amendment dated 07/07/2003 have been received and entered.

Accordingly, due to crossed mail, the office action dated 05/18/2004 is hereby withdrawn and the new ground(s) of rejection as follow:

Claim Objections

1. Claims 26-31 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. In particular, claim 1 has been canceled; so as those objected claims should depend on claim 25.

Double Patenting

2. Claims 25-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 of U.S. Patent No. 6,833,887. Although the conflicting claims are not identical, they are not patentably distinct from each other because both application and the patent disclose the same liquid crystal shutter having a twisted angle of greater than 180° , a pair of polarizing plates and a driving circuit for driving the liquid crystal shutter.

Art Unit: 2871

It should be noted that the original driving method claims has been canceled, so the driving circuit for a liquid crystal shutter as currently amended should be rejected over the parent application (US 6,833,887).
